3M™ SecureFit™ Protective Eyewear

## Performance. Style. Comfort.

### 3M™ SecureFit™ Protective Eyewear

Protecting your vision on the job is important. But it doesn't have to mean sacrificing style or comfort. Get eyewear that performs — and looks good doing it. Featuring a comfortable fit and a sleek profile designed to work with other personal protective equipment, 3M™ SecureFit™ Protective Eyewear helps keep you safe and comfortable on the job.

## The science of comfort.

We collected data on head and face shapes around the world to develop a patented design that self-adjusts to individual head sizes. This design provides the same level of comfort to individuals across a diverse workforce.

Regardless of head size, from small heads to large heads, our 3M™ SecureFit™ Pressure Diffusion Temple Technology is designed to provide a secure and comfortable fit for an extended period of wear time.

## Designed to perform.

### Curved temples for enhanced security

Our design applies pressure on the less sensitive back of the head instead of the temples, achieving a comfortable fit even during rapid head movement.

### 3M™ Pressure Diffusion Temple Technology

3M's innovative temple design features slotted ribs that provide comfortable pressure equalization, allowing the temples to flex and self-adjust to the size of the wearer's head.

## The benefits are clear.

Fogged lenses can be frustrating and dangerous. But 3M™ SecureFit™ Protective Eyewear models featuring 3M™ Anti-Fog Coating can help workers see clearly for longer, thanks to an active ingredient that bonds the coating to the lens.

**Uncoated**

Microscopic water droplets bead up, forming condensation and fog, which obscure vision.

**3M™ Anti-Fog Coating**

Reduced contact angle flattens water beads into a thin, transparent film that allows light to pass through.

## 3M™ Scotchgard™ Protector Anti-Fog Coating

- Resists fogging longer than traditional anti-fog coatings through up to 25 washings with water.\*
- Helps provide scratch resistance in tough work environments.
- Designed for working in challenging situations, such as hot and humid conditions, indoor/outdoor work, physically demanding tasks and climate-controlled areas.
- Workers can feel confident wearing 3M eye protection that meets both the Impact-Rated Protector and Anti-Fog Performance (X) requirements of the ANSI-ISEA Z87.1-2020 to AS/NZS 1337.1:2010 Standard.

\*Only available in Solus 1000 Series.

## Additional resources

### Fit testing

Eye injuries can occur even while wearing eye protection if the safety glasses do not fit properly. When fitted properly, eyewear should cover the soft tissue around the eye. Small spectacles on larger heads can leave exposed areas. Spectacles that are too large for a person can leave gaps. Selecting the proper eye protection for the task and ensuring proper-fitting eyewear can help to reduce worker eye injuries.

3M has developed a step-by-step method to ensure you can find your best-fitting protective eyewear, and can help you to validate properly fitting eyewear.

## A difference you can see and feel.

Eyewear that's lightweight and comfortable — believe it. Contact your 3M sales rep to request trial wear samples of 3M™ SecureFit™ Protective Eyewear and feel the difference the instant you put them on. See for yourself.
